

# Cybersecurity Assurance Readiness (CSAR/RMF Pro) Your Best Hope for ATO Survival

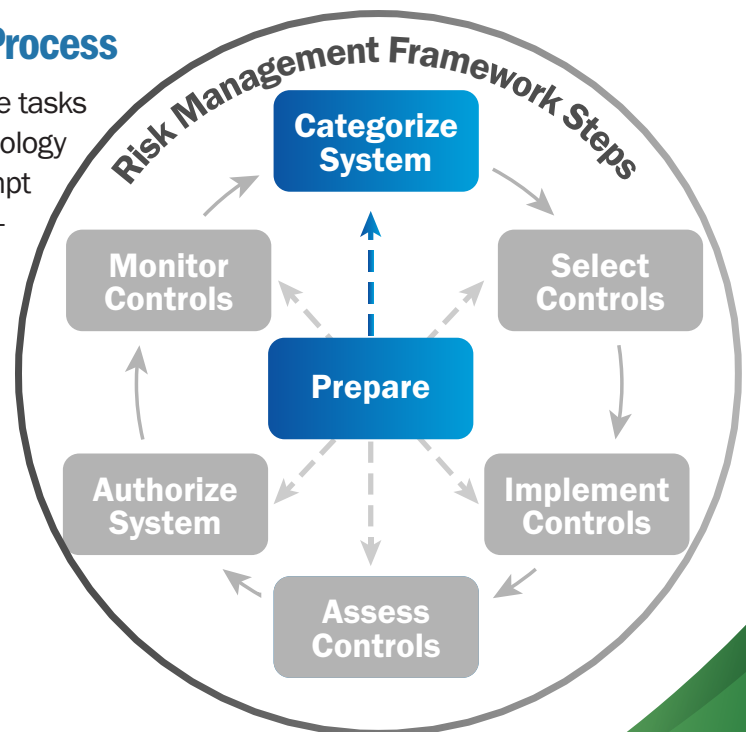

## What Is CSAR/RMF Pro?

CSAR/RMF Pro simplifies the path to Authorization to Operate (ATO) approval through automation and advising, supporting the Prepare and Categorize System steps of the Risk Management Framework (RMF). CSAR/RMF Pro employs an automation driven modular approach while keeping a human-in-the-loop to actively review applications for accuracy and provide feedback, guiding the user forward to a “mature cyber environment” and on path toward an authorization decision. The entire experience offers refined processes to reduce chance of errors, confusion, and fatigue.

## CSAR Streamlines & Simplifies the ATO Process

CSAR/RMF Pro eliminates the unknowns and repetitive tasks that delay and disrupt timely delivery of valuable technology to our military. Users are enabled to make smart, prompt decisions, allowing applications to be adaptive in keeping pace with RMF requirements around cybersecurity threats and vulnerabilities.

Within the RMF Framework, CSAR/RMF Pro provides capabilities around the Prepare and Categorize System steps, helping to simplify the ATO process, specifically for those who aren't RMF experts, which saves time and increases efficiency and accuracy.

## 4 Benefits of CSAR/RMF Pro

### Mapping of AF Mandatory Forms

CSAR/RMF Pro eliminates redundancy with automation and distinct, easy to manage form completion. Answer once, and all sections of the corresponding mandatory ATO forms (such as the ITCSC, PIA, and PCIL) are filled out with ease.

### Intuitive Dashboard

One easy to read dashboard provides clarity and focus, allowing users to track the status of applications. This design readily supports the understanding of package progress and provides a visually concise view into the current projected timeline submission and critical information.

### Human-in-the-Loop

With the included RMF Advisory Services, users will be working with a Support Expert who is there from the beginning to assess needs, customize process solutions, and help clear milestone “checkpoints.”

### Cyber Plans

CSAR/RMF Pro gives users access to customizable templates to streamline the RMF Plan development process, positioning users for a successful entrance into the RMF lifecycle.
